

Amendments to the Specification

The title has been amended to correct the spelling of "pneumophila" and now reads: "PRODUCTION METHOD AND FILTER COMPRISING NON WOVEN FABRIC AND/OR FILTERING INJECTOR STRUCTURES OR SHEETS WHICH ARE OBTAINED USING SAID METHOD AND WHICH ARE INTENDED FOR THE FILTRATION AND ELIMINATION OF LEGIONELLA PNEUMOPHILA IN ANY INSTALLATION AT RISK FROM LEGIONELLA PNEUMOPHILA PROLIFERATION".

The specification has been amended to remove informalities such as claim numbers and reference to prior applications. A substitute specification as defined in 35 C.F.R. 1.125 is included with this submission along with a marked copy of the application. No new matter has been added to the specification. It would be appreciated if the Examiner would acknowledge acceptance of the application with the next communication.
